

vdiscovery is a nationwide provider of proprietary and best-in-breed solutions in computer forensics, document review, and data management for corporations and law firms. Our expert consultants, responsive service, custom software development, and mastery of leading technologies serve our clients' needs, and theirs, with a scope of quality unparalleled in today's market.

PROPRIETARY SOLUTIONS

vdiscovery develops proprietary tools and quality-control integrations that offer intelligent solutions at all phases of discovery and beyond.

- ✓ **VECA**
- ✓ **BatchGuru**
- ✓ **TrialPrep Manager**
- ✓ **Integration Helper**
- ✓ **QC Tools**
- ✓ **Data Parsing**

OUR SERVICES

Our consultants are highly trained to offer discovery strategies that save money and increase efficiency. Advanced technologies, best practices, and a common sense approach.

vdiscovery uses early case assessment tools and proprietary methods to rapidly identify and streamline large categories of documents for review and production. Because we process and host locally, we can immediately load your data for review.

Our project managers will work with you to arrange, sort, and categorically identify documents as responsive, privileged, and non-responsive.

We adhere to strict protocols to ensure evidence defensibility. Our experienced team includes EnCase-certified (EnCE) experts who collect, preserve, and investigate your data. The *vdiscovery* team can even testify to defensible process as needed.

vdiscovery's data centers maintain the highest level of security to ensure that your data is safeguarded and accessible at all times. *vdiscovery* has been a Premium Relativity Hosting Partner since 2009.

Since 1973 *vdiscovery* has offered fast and accurate scanning, photocopying, printing, and file preparation from all sources.

Custom Solutions

We independently develop and customize software solutions to meet our clients' case and data needs. Our focus on customization, innovative technologies, and next-level service ensures our clients the evidence and facts they need, when they need them.

Best in Service

vdiscovery has been a Relativity Premium Hosting Partner since 2009 with numerous certifications including "Best in Service" since 2016. We are recognized as a Relativity Development Partner for our BatchGuru toolkit developed on Relativity's API.

Expert Consultants

vdiscovery's consultants know the importance of managing costs and identifying options early. Our consulting team is comprised of experts with years of experience navigating the complexities of electronic discovery.

DATA CULLING REINVENTED, BY VDISCOVERY.

Attorneys whose clients face large disputes or investigations are too often caught between the 'rock' of the client's litigation budget, and the 'hard place' of their own duty to counsel a defensible data preservation under the FRCP. Choosing one at the expense of the other could upset the client, harm the case, or do both.

THE ONLY TOOL OF ITS KIND FOR CULLING FORENSIC IMAGES

Contextualize

Metadata is loaded much more quickly than full documents, instantly graphed and charted to allow for bulk tagging.

Collaborate

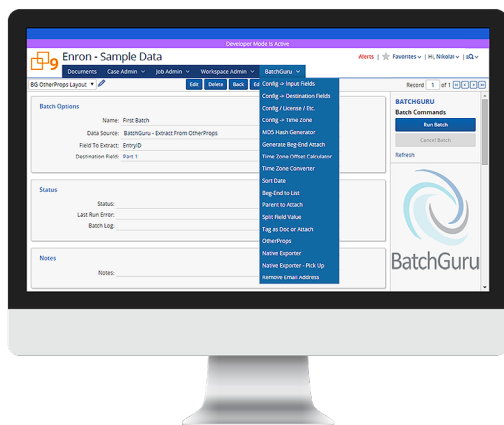

Sift data transparently with your client, IT personnel, or knowledge managers to make clear decisions, quickly.

Cut Costs

Promote only the files you need for full review, leave the junk behind - pay one low price per device.

Customize

Familiar Relativity workspace populated with useful widgets customized to the needs of your matter.

POWERFUL FEATURES

vdiscovery enhances its Relativity hosting with the BatchGuru tool collection, enabling users to easily perform technical tasks that are usually time consuming and often reserved for tech support teams. BatchGuru is a collection of tools that extends Relativity's functionality.
